MIKIMOTO

Ring size guide

Before printing this guide

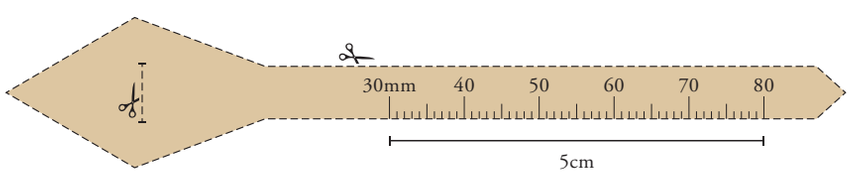
* If your printer setting is *fit to the printable area* or *fit to the paper size*
you will not be able to print using the original dimensions.
In this case, please change this setting before printing,
as the printable area differs for each individual printer.

Before measuring

•Please print this ring size guide using paper scaled to 100%.
•If the length of the measuring tape below is 5cm using your own ruler, it has been printed correctly.

Measuring using the measuring tape

Please cut out the measuring tape, and then make an additional cut
along the dotted line where you see the scissors symbol.
Next, wrap the measuring tape around the finger where you will place the ring,
either around the base or the second joint—whichever has the larger width.
Place the end of the measuring tape through the hole where you have
cut along the dotted line, pulling tightly. Then, measure at the point where
you are unable to pull any further, and make a note of the ring size using the chart below.
* Please be sure not to make a tear in the measuring tape while measuring.



Circumference	47.8mm	49.0mm	50.3mm	51.5mm	52.8mm	54.0mm	55.3mm	56.6mm
U.S. ring size	4 1/2	5	5 1/2	6	6 1/2	7	7 1/2	8

MIKIMOTO

Measuring using your own ring

Place your ring atop the circles below, and then select the circle
whose outline fits perfectly with the ring's inner circumference.
(Please be sure to align the ring's inner circumference with the four corners of the square.)

*If the length of the measuring tape below is 5cm using your own ruler, it has been printed correctly.

5cm
